

23 May 2023
Martin Johnsson

Hi! My name is Martin Johnsson and I am contacting you because I am interested in the role of Front End Engineer.

In May this year, I will graduate as a Frontend Developer from EC Ubildning in Helsingborg and I look forward to continuing to develop in my professional role. During my studies, I have interned at two companies, a consulting firm and a product company in telecom and fintech. The time at the two companies has allowed me to continue developing and refining skills in areas that are important to a developer; working in an agile team, according to the principles of Scrum. Working in the teams I have gained experience working in Jira. I have also had the opportunity to develop my skills in React, Typescript, and CSS in the form of CSS-In-JS and C#. Furthermore, I have gained experience in version control using Git, GitLab, and GitHub. In my work, I strive to always do my utmost to achieve good results. I believe that I will be a valuable asset to your team because I am thorough, quality-conscious, and organized. It is important for me to always have a good attitude in contact with colleagues and customers.

I work well individually as well as in a group and have many years of experience from my time as a teaching assistant and substitute teacher in primary school. There, I continuously worked to identify students' needs and desires to best meet them. Something I carry with me is the importance of creating a good group dynamic to achieve a goal together and to constantly be adaptable and responsive to situations that arise. These experiences have been beneficial in the teams I have been a part of during my internships. I would describe myself as engaged, stress-resistant, empathetic, and goal-oriented. My interest in web development, high work ethic and being a team player are three of my main strengths and something that I believe would make me successful with you.

I am looking forward to a personal meeting where I can tell you more about myself!

Best regards,
Martin Johnsson

I maj 2023 tar jag examen som Frontendutvecklare från EC Utbildning i Helsingborg och jag ser väldigt mycket fram emot att fortsätta utvecklas i min yrkesroll. Under min studietid har jag haft LIA på två företag, ett konsultbolag samt ett produktbolag inom telekom och fintech. Tiden på de två företagen har givit mig chansen att fortsätta utveckla och förädla kunskaper inom områden som är viktiga i arbetet som utvecklare; arbetet i ett agilt team, enligt principerna i Scrum, samt fått erfarenhet av att arbeta i Jira. Jag har även fått möjligheten att utveckla mina kunskaper i React, TypeScript, CSS i form av CSS-In-JS och C#. Vidare har jag även erhållit erfarenhet av versionhantering i Git, GitLab och Github. I mitt arbete strävar jag efter att alltid göra mitt yttersta för att nå gott resultat. Jag tror att jag kommer att vara en värdefull tillgång till ert team eftersom jag är noggrann, kvalitetsmedveten och organiserad. För mig är det viktigt att alltid ha ett gott bemötande i kontakt med både kollegor och kunder.

Jag arbetar bra självständigt såväl som i grupp och har många års erfarenhet från min tid som elevassistent och lärarvikarie inom grundsärskola. Där arbetade jag kontinuerligt med att identifiera elevers behov och önskemål för att på bästa sätt tillgodose dessa. Något jag bär med mig är vikten av att skapa en god gruppdynamik för att tillsammans nå ett mål och att ständigt vara anpassningsbar och lyhörd för situationer som uppstår. Dessa erfarenheter har varit fördelaktiga i de team jag tillhört under mina LIA-perioder. Jag skulle beskriva mig själv som engagerad, stresstålig, empatisk och målinriktad. Min höga arbetsmoral, att jag är en lagspelare och mitt intresse för webbutveckling är tre av mina främsta styrkor och något som jag tror skulle göra mig framgångsrik hos Er.

Jag ser fram emot ett personligt möte där jag kan berätta mer om mig själv!

Med vänliga hälsningar,
Martin Johnsson

Dear [recruiter]

My name is Martin Johnsson, and I am writing to express my interest in the Front End Developer position. I am excited to share my experience and qualifications with you.

I will be graduating as Front End Developer from EC Utbildning in the end of May. I've completed internships with a consulting firm and a product company in the telecom and fintech industries during my studies. I have honed my skills working in agile teams using Scrum principles and use of Jira, deepened my skills in React, TypeScript, CSS in the form of CSS-IN-JS and C#. Working with Git, GitLab and Github I've gained expertise in version control.

I take pride in delivering high-quality work and strive to always e

Dear [Recruiter]

I hope this letter finds you well. My name is Martin Johnsson and I am writing to express my interest in the Front End Developer role at your company.

In May of 2023, I will be graduating as a Frontend Developer from EC Ubildning in Helsingborg. I am excited to continue developing my skill and knowledge in my role as a developer and I believe that this employment would provide an excellent opportunity to do so.

During my studies, I have had the privilege of interning at two companies, a consulting firm and a product company in telecom and fintech. Throughout these experiences, I have gained valuable skills working in agile teams, where UX also have been included, according to the principles of Scrum and in Jira. I have also gained skills working in React, TypeScript, CSS-IN-JS and C# as well as version control using Git, GitLab and GitHub.

My approach to work is one of thoroughness and quality consciousness. I believe that these qualities would make me a valuable asset to your team. I am also committed to maintaining a positive attitude in my interactions with both colleagues and customers.

I work well independently as well as in a group. Beyond my technical abilities, I have experience working in education. I have previously worked as a teaching assistant and substitute teacher in primary school. While working with the students I learned of the importance of identifying the needs of the individual student as well as the group and I continuously tried to satisfy these the best I could. By being adaptable and responsive to the needs of others I was able to create a good group dynamic which was one key element in the success of reaching the mutual goal. The experiences that I gained as a teacher have proven to also be beneficial to me in the teams I have been a part of during my internships.

Conclusively I would describe myself as having a high work ethic as well as being stress resistant, empathetic and goal-oriented. I believe that these qualities along with the fact that I am a team player and my interest in web development would make me a great asset to your team. I am eager to meet with you in person to discuss this opportunity further. Thank you for considering my application.

Best regards,
Martin Johnsson
